Bracket for SI SN

adjustable

The adjustable mounting brackets for the SI SN series enable a stable, neat and professional installation of the antistatic compressed air nozzles. Thanks to their adjustable design, the nozzles can be flexibly and optimally aligned with the respective product or area of application. The self-locking mechanism ensures that the nozzle is securely and stably fixed in the selected position. The powder-coated metal bracket, combined with the robust PVC nozzle holder, ensures high stability and durability, as well as a robust construction suitable for industrial applications. The mounting brackets allow for easy installation and provide a professional solution for the reliable fixing and positioning of the SI SN nozzles.
