SI SNG1000 antistatic nozzle gun

Ø 27,5mm / 10m high-voltage-cable

The SI SNG1000 is an antistatic gun - a combination of the SI SN antistatic air nozzle and the SILVENT Delrin compressed air gun.

The antistatic gun has a compact design, meaning it is particularly suitable for use in difficult to reach places, and areas with limited access. The compressed air means high distribution of ions is attained. Worthy of particular mention here is usability of the antistatic gun for tackling static charging for 3-dimensional objects. The SI SN antistatic air nozzle has five needle-like ion tips. Two standard cable lengths (5.0 and 10.0 m) are available at short notice.

Technical data

Item number	940070
Weight	0,850 kg
Air connection	4 mm
Material	Aluminium
Trigger	Trigger-type
