Replaces open tube Ø 7 mm

Noise reduction 67 %

Air-/ cost savings 38 %

Silvent 703

Wide nozzle

SILVENT 703: specially made entirely of stainless steel with aerodynamic slots to allow optimal utilization of compressed air while keeping the noise level to a minimum. The high ambient temperatures of a glass works, the extreme blowing forces used in a steel mill or the stringent hygienic requirements of the food processing industry are examples of typical areas of application. Blowing force approx. 3 times stronger than SILVENT 701 (9.6 N (33.9 oz)). Part of SILVENTs 700 series, together with 701, 705, 710 and 720. Fully meets OSHA safety regulations and EU Machine Directive noise restrictions. Patented.

Technical data

Item number	717039
Air consumption	57 Nm³/h
Air connection	1/2 "
Sound	89 dB(A)
Blowing Power	9.6 N
Dimensions LxWxH	Ø 25 x 29 mm
Material	Stainless Steel
Air pattern	Wide
