

Replaces open tube Ø 20 mm

Noise reduction 78 %

Silvent Pro 4-180 compressed air gun

Pro 4 high-performance gun / VA
multi-purpose nozzle X020 / 60.0N / IG 3/4"
L= 180mm

SILVENT Pro 4 is an ergonomic and energy-efficient blowing tool equipped with a patented Multilaval compressed air nozzle that delivers extremely high and concentrated blowing force. The Pro 4 is the result of many years of research and development and enables safe and ergonomic performance of demanding manual blowing tasks in the shortest possible time. The handle of the air tool has been developed in close collaboration with industry professionals. The result is an extremely robust handle that minimises strain during use and withstands the demands of daily use in harsh industrial environments. The Pro 4 stops immediately if dropped, and thanks to the handle design, the trigger is protected to prevent accidents. The blow tool is always supplied with the SILVENT SWB 34 swivel joint, which improves operator mobility and creates a better working environment. The blow tool is equipped with Silvent's patented SILVENT X20 nozzle, which generates 20 times more blowing force than a conventional air gun. At the same time, the noise level remains low thanks to Silvent's Multilaval technology. Designed for applications that require extremely high blowing force in demanding environments, such as paper mills. The product is also very effective for cleaning large areas, including production areas in the food industry.

Technical data

Item number	729710
Weight	1523 g

Air consumption	320 Nm³/h
Air connection	G 3/4"
Sound	104 dB(A)
Blowing Power	60.0 N
Max. Operating pressure	0.7 MPa
Replaces open tube	Ø 20 mm
Max temperature	70 °C
Material	1.4404 Stainless Steel
Air pattern	Multi Laval
