

Replaces open tube Ø 25 mm

Noise reduction 80 %

Silvent Pro 4X-2000 compressed air gun

Pro 4X high-performance gun / VA
multi-purpose nozzle X30 / 100.0N / IG 3/4"
L= 2000mm

SILVENT Pro 4X is an ergonomic and energy-efficient blowing tool equipped with a patented Multilaval compressed air nozzle that delivers extremely high and concentrated blowing force. The Pro 4X is the result of many years of research and development and enables safe and ergonomic performance of demanding manual blowing tasks in the shortest possible time. The handle of the blowing tool has been developed in close collaboration with industry professionals. The result is an extremely robust handle that minimises strain during use and withstands the demands of daily use in harsh industrial environments. The Pro 4X stops immediately when dropped, and thanks to the handle design, the trigger is protected to prevent accidents. The blow tool is always supplied with the SILVENT SWB 34 swivel joint, which improves operator mobility and creates a better working environment. The blow tool is equipped with Silvent's patented SILVENT X30 nozzle, which generates 30 times more blowing force than a conventional air gun. At the same time, the noise level remains low thanks to Silvent's Multilaval technology. Designed for applications that require extremely high blowing force in demanding environments, such as paper mills. The product is also very effective for cleaning large areas, including production areas in the food industry.

Technical data

Item number	729790
Weight	3027 g

Air consumption	525 Nm ³ /h
Air connection	G 3/4"
Sound	108 dB(A)
Blowing Power	100.0 N
Max. Operating pressure	0.7 MPa
Replaces open tube	Ø 25 mm
Max temperature	70 °C
