SI BNG500 antistatic gun Ø49mm - with 5m HVC

The SI BNG500 is an antistatic gun - a combination of the SI BN antistatic air nozzle and the Acetal compressed air gun. The antistatic gun has a compact design, meaning it is particularly suitable for use in difficult to reach places, and areas with limited access. The compressed air means high distribution of ions is attained. Worthy of particular mention here is usability of the antistatic gun for tackling static charging for 3-dimensional objects. The SI BN antistatic air nozzle has eight needle-like ion tips. The extremely lightweight, red anodised and rugged aluminium housing protects the swepro IONic technology. Two standard cable lengths (5.0 and 10.0 m) are available at short notice.

Technical data

Item number	940021
Weight	0,800 kg
Air connection	1/4" IG BSP
Material	Aluminium
Trigger	lever
