SILVENT 2050-X+ is an aluminum safety air gun designed with a revolutionary air nozzle technology for optimal efficiency, safety and noise reduction. The new patented multi Laval technology constitutes a new dimension in blowing technology. The effect is achieved by optimising the air pressure change from potential energy to aimed concentrated kinetic energy. The stainless steel air nozzle is the outcome of Silvent's leading R&D in compressed air dynamics. The air gun is suitable in any industry where durable tools are required to make the job quick, quiet and with the operator's safety in mind. Our 2050 safety air gun series is available with six different extension pipe lengths. The pipes are made of galvanised steel.
