SW 135M Air Die Grinder (isolated)

3 + 6 mm Collet / roll-release

swepro SW 135M - The SW 135M is a handy, compact and extremely robust air die grinder. Due to its very low-vibration running it is ideal for grinding, polishing and deburring. The isolated handle protects the user against temperature development which improves the working environment. Additionally, the rear exhaust hose protects from turbulences in the workplace. One new feature of the new air die grinder is the locking of its exhaust hose connection by a nut to the housing. This strengthens the connection and avoids oil leakage. The SW 135M can be started easily with the practical roll-release. The grinder can operate with a 3mm and a 6mm collet.

Technical data

Item number	784150
Free speed	35.000 1/min
Dimensions LxWxH	L=175 mm
Weight	0,350 kg
Sound	74 dB(A)
Collet	3 + 6 mm
Air connection	1/4 "
Vibration	0,6 m/s ²
Max. Operating pressure	6,3 bar
Trigger	Roll
