SW SH1050PUB Spiral hose

PU braid, Ø10x6,5mm, L=5,0m, Coiling Ø33mm, AG 1/4" BSP(T)

SW SH1050PUB is a spiral hose of the latest generation. It is reinforced with a nylon net. Despite the reinforcement, the hose is very flexible. Due to the small windings the hose offers an optimal handling, even in small spaces. Kink protection on both sides and high-quality 360° swivel connections round off the overall concept of the new PU hose. The spiral hose is available in the following lengths: 2,4m/3,6m/5,0m./7,5m.

Technical data

Item number	769605
Weight	0,4 kg
Max. Operating pressure	15 bar
Operating Temp. Range	-20° / +60°
Outside coil diameter	55 mm
Hose diameter (outside)	10 mm
Hose diameter (inside)	6,5 mm
Connection	1/4"
Insulating	Polyurethan (PU)
