SW 2599 Vibration reduced needle scaler

**needle size Ø3mm x L=180mm / 4.800
1/min**

swepro SW 2599 - The vibration-reduced gun needle scaler is the perfect tool for removing coatings from solid metal parts. The aluminium housing with an ergonomic and damped handle offers the user good balance and is also ideal for two-handed operation. This powerful yet handy tool with button release is very effective e.g. for removing rust from solid frame parts and iron fences. The SW 2599 is also suitable for knocking off welding slag, paint, plaster or concrete.
