SW 2588 Vibration-reduced chissel hammer

2.100 1/min - 87mm piston stroke

swepro SW 2588 - The robust, low-vibration pistol-type chisel hammer with ergonomic and damped handle has a button release and is ideally suited for industrial use. It is suitable, for example, for all material removal work in foundries, machine shops, shipyards and construction sites. Its exhaust air changeover makes it possible to switch between a front and a backflow direction. Common applications are e.g. the cutting of sheet metal, the knocking off of bolts, rivets, tiles or plaster and slit work. Thanks to the quick coupler, the chisels can be changed quickly and easily.
