SW 6600 saw & file

low vibration / Stroke frequency: 5000 1/min

swepro SW 6600 - Its a combined saw and file tool and suitable for many applications. With a stroke rate of 5,000 h.p.m. and a stroke length of 10mm, it is ideal for body work and sheet metal work. Saw blades with 24T and 32T and five different files are included in delivery. An adjustable safety bar secures and defines the application. There are no turbulences in the application area of the saw, caused by a rear exhaust hose. SW 6600 has a very low vibration and sound level.
