

swepro 0,5hp Grinder.
Strong. Durable. Low vibration.

swepro 0,5hp Grinder. A strong base. Many possibilities.

The new 0.5 hp grinder series convinces with a very handy design and impresses with high quality. To ensure a long service life and maximum user comfort, high-quality German ball bearings and Kevlar blades were selected for the inner workings.

As a result, the units have low vibration and low noise levels.

To make our grinder best fit your application, we have chosen three different variants: a straight, extended and angled grinder.

The grinders are ideal for gloss grinding, polishing and deburring.

swepro 0,5hp Grinder. A strong base. Many possibilities.

SW 7623 bar grinder

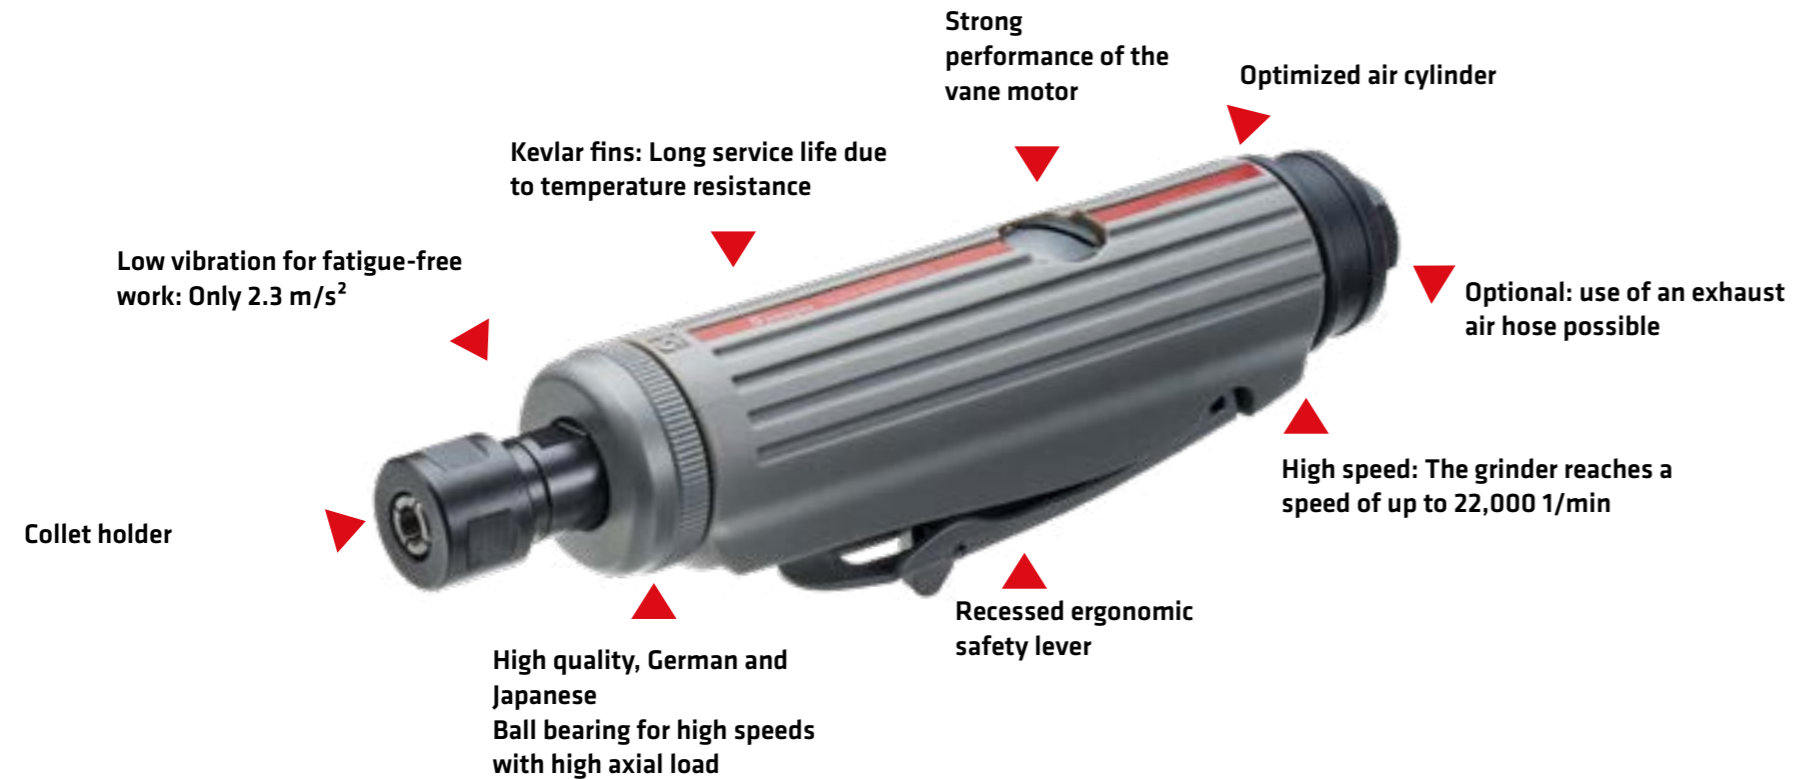

SW 7624 long-neck stick grinder

SW 7625 angle grinder

swepro 0,5hp Grinder. A strong base. Many possibilities.

Sophisticated design. Outstanding quality.

Kevlar lamellae

The Kevlar flaps are characterized by a particularly high quality, as well as a temperature resistance up to 400°C. They convince with a long service life, which makes the grinders very efficient and durable.

Optimized air cylinder

The surface finish in the air cylinder is very fine due to the material selection and the roughness is significantly reduced. This ensures continuous lubrication of the blades, which has a positive effect on service life.

High performance ball bearing

The use of high-quality German (Schaeffler FAG) and Japanese (NSK) ball bearings significantly increases the quality or service life of the tool, as the friction in the ball bearing decreases and wear is reduced..
